

NAVIGATING THE CONVERGENCE TO IMPROVE HEALTHCARE SYSTEMS

April 21st h. 13.00 – 14.30 p.m. CEST

Managing the MedTech, BioPharma and Digital Revolutions for the Benefit of Patients, Health System Sustainability, Access to Health and Growth

The 90 minutes digital event organized by the B20 Health & Life Sciences Task Force, aims to provide policymakers and sector experts with a deeper and cross-discipline understanding of how advances in medical technologies, biopharma, and digital capabilities are changing healthcare and how to leverage the technological advances for the benefits of patients, the sustainability of healthcare systems and the growth in strategic Life Sciences sectors.

BACKGROUND TO THE EVENT

The event develops from the recommendations at the core of the Policy Paper being drafted by the B20 Health & Life Sciences Task Force to address the current pandemic scenario and future global challenges.
