

THE ITALIAN INDUSTRY OF MACHINERY, ACCESSORIES AND SPECIAL PRODUCTS FOR GLASS PROCESSING

While figures remained very positive during 2004, the Italian industry of machinery, accessories and special products for glass processing also posted a fall in orders from domestic and overseas customers, although to a lesser extent than in 2003 versus 2002.

The slightly upward trend in the second quarter of the year became consolidated, resulting in satisfactory annual sales by the industry.

IMPORTS

Imports increased significantly overall (+23.73%) versus 2003. However, if the two sectors in the industry are examined in detail, the figures are completely different:

- Machinery and accessories for cold processing (flat glass): - 8.57%

- Machinery and accessories for hot processing (hollow glass): +35.24%

With **imports** at slightly less than €52 million, flat glass machinery amounted to just over €10 million, while Italian producers of hollow glass imported €41.8 million worth of products from overseas.

Table I shows the trend over the past three years: 2002, 2003 and 2004, with percentage changes between 2004 and 2003.

Table I - Imports 2004

EXPORTS

Total exports rose by 8.07 %, amounting to more than € 828.7 million. The trend here was the same for both sectors; in fact, exports increased in both:

- machinery, accessories and special products for flat glass + 8.50%
- machinery, accessories and special products for hollow glass + 7.04%

The European Union, accounting for 37.7% of total exports, remains the main market for Italian machinery exports, which rose slightly over 2003, also because of the number of EU-member states increasing from 15 to 25.

As a result, the figure for the other European countries fell significantly from 25.44% in 2003 to 19.87% in 2004.

Exports to America increased by 9% over 2003, following the weak recovery in the U.S. and Canadian markets, but primarily because of the strong rise in exports to Mexico which proved to be the healthiest market in the area during 2004. At 2.26% of total exports, Mexico was the second largest customer after the United States, for our industry.

Table 2 shows the export figures for the past three years, and compares the percentage changes between 2003 and 2004.

Table 2 - Exports 2004

| EXPORTS OF MACHINERY, ACCESSORIES AND SPECIAL PRODUCTS FOR | | | | | | |

| Oceania and other territories | Other territories | 1.93 | | |

SALES BY THE GLASS INDUSTRY

The Italian industry of machinery, accessories and special products for glass processing managed to close 2004 with another trade surplus, with increased sales for flat and hollow glass and stable export figures (+72% of total production).

However, domestic businesses are carefully monitoring some areas where market shares are more vulnerable due to tough competition from other countries.
